

Thoughts from the Caretaker...

The Buckley cemetery is considered an enterprise, meaning it operates solely on the revenues it generates through plot sales, headstone sales and service charges required for funerals. We receive no money from the general fund (tax money).

So, How many times have you heard someone say: "When I die just throw me in the ocean or scatter me on Mt. Rainier...I could retire if I got a nickel for every time I've heard that.. While it is meaningful, It doesn't allow for a permanent recording of ones life. 50 years from now there will be no place for that great grandchild to stand and read the headstone from where he came three generations ago.

USE THE CEMETERY! We are building it up. We are not letting it go.

When you need something. If you have a question, Please call or e-mail me. As I am also now the Parks Maintenance lead you won't always find me at the cemetery but I'm close. I have 20 years of cemetery experience and it is all based on customer service. If I can help you I will. The cemetery is our trophy case. It is recorded history of those that brought us to this point and we will continue to honor their memory as we continue to care for and improve our cemetery.
