

Cemetery Entrance Shrubs

Taxus media 'Hatfieldii' Hatfield's yew

Viburnum tinus Laurustinus

Cotoneaster dammeri 'Lowfast'

Cotoneaster horizontalis

All shrubs are drought tolerant, tough, and low maintenance. The sides of the berms will be covered by these last shrubs, helping to keep weeds down. The berries are long-lasting and will create interest. The yew and laurustinus will help define the sides of the road and need no pruning.
