2016 White River Communities Champion Award

The Community Champion Award was established by the White River Families First Coalition in 2011 as a way to recognize the service and dedication of those who make our community better. We frequently come across these community champions in our lives but they are often behind the scenes, or the extent of how they impact others is not always known. For many, it is their life's work. The recipients are nominated by members of our community because they have made a powerful difference without necessarily having the benefit of holding an office, title or position. If you would like to nominate an individual or group who has made a powerful difference in our community (or for more information), please attach a page that describes this work in an e-mail Monica Gaub by Friday, April 15, 2016 at gaublins@msn.com.

Kiwanis Annual Fishing Derby

April 30th, 2016
For ages 12 and under
Fishing starts at 7 AM
Prizes are awarded at 9 AM
Kids can fish till noon.
Sponsored by Buckley Kiwanis
and the Buckley Fire Department

BUCKLEY SPRING CLEANUP

APRIL 11-14, 2016

This year Buckley's Annual Residential Spring Cleanup Program will be held April 11th through April 14th, 2016. D.M. Disposal Service and the City Shop Crew will jointly sponsor this year's program. The program will work the same as in years past. **Please read below.**

All items will be collected curbside where your normal garbage is picked up on **WEDNESDAY**. Have them at the site by 7:00 AM on pickup day.

You will be allowed three extra bags or containers of garbage. Please have up to three extra bags or cans sitting next to each other and set slightly apart from the other items so the driver can easily distinguish them. Please remember that there is a weight restriction of 45 lbs. per container.

You will also be allowed three extra containers of yard waste **ONLY IF YOU PAY FOR YARD WASTE SERVICE**. Please do not put the yard waste in plastic bags because plastic is a contaminant in the composting process. Use cardboard boxes or an extra garbage can. The yard waste must not be longer than three feet in length and must be bundled. Place all the extra containers next to your yard waste container. Try to keep the yard waste clearly separated from the garbage. Each container must weigh less than 45 lbs.

The last item allowed is a major appliance. This could be a refrigerator, freezer, range, dishwasher, trash compactor, washing machine, dryer or hot water heater. **Microwave ovens, televisions and small appliances will not be accepted.** The major appliances will be collected by a separate truck and recycled. **PLEASE PUT THEM IN FRONT OF THE HOUSE, APPLIANCES WILL NOT BE PICKED UP IN THE ALLEY.** We can only accept one appliance per household.

Appliances will be picked up all week so if you have an appliance, please put it out on Monday.

If you have any questions, please call Devon Boyle at 360-761-7810.

Rain Barrel Workshop

Harvest Rain for Your Yard & Garden!

Spring showers not only bring flowers, but also the chance to collect, store, and use the abundant Washington rainfall for your personal irrigation needs. Rain barrels are one way home owners can harvest the rain, and with this workshop, it's fun, easy, and free!

Sponsored by the City of Buckley and the Pierce Conservation District, this workshop will cover the history of rain water harvesting and best uses for rain barrel water, and provide guidance to assemble and take home your very own rain barrel (free!), ready for installation under a gutter of your choice!

Cost? It's FREE!
This includes the make-and-take activity of one rain barrel per household!

Date:
Monday, June 13, 2016

Time:
6:00 – 7:30 p.m.

Place:
Buckley Fire Station
(611 S. Division St.)

Pre-registration is required, and there is a limit of **one free rain barrel per household**.

Sign up on-line at:

<http://tinyurl.com/BuckleyRB-2016>

Space is limited, and previous classes have filled quickly, so register soon! Priority will be given to City of Buckley residents.

Contact Jayme Gordon to register:

Phone: (253) 845-9770 ext. 102

E-mail: jaymeg@piercecountycd.org

*Protecting Washington's waters
from stormwater pollution*

Stormwater runoff is damaging salmon habitat. It's the Number 1 water pollution problem in the urban areas of our state, and it causes and contributes to flooding.

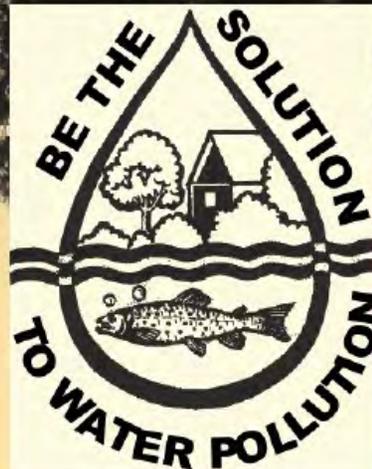

Chances are pretty good you've seen stormwater runoff. It's the water from rain or snow that runs off yards, roofs and roadways. As gravity pulls it downhill into low spots, ditches and storm drains, the water picks up soil, chemicals and other pollutants and carries them into our lakes, rivers and marine waters.

Our waters and salmon as well as other fish and wild-life species aren't the only things at risk. Stormwater problems also affect the health and safety of people.

As we develop land to accommodate Washington's growing population, our state's stormwater problem grows, too. The good news is we can do something about it—all of us.

In Washington, the state Department of Ecology, the U.S. Environmental Protection Agency and local governments all work together to regulate stormwater. The key to solving the problem isn't really in the rules and permits. It's in people—how we live on the land and the everyday choices each of us makes.

Washington Waters – Ours to Protect

Stormwater Runoff

Stormwater runoff is unfiltered water that reaches streams, lakes, sounds, and oceans by means of flowing across impervious surfaces. These surfaces include roads, parking lots, driveways, and roofs. This brochure will help you understand the impact that stormwater runoff has on all of us.

What's the problem?

When land is left in its natural state, the majority of rainfall soaks into forests and meadows, flows slowly underground, is filtered by natural processes, and eventually feeds streams, lakes, underground aquifers, and Puget Sound.

The natural process of water soaking into the earth is destroyed when we cover the land with buildings, roads, and parking lots. The existing meadows and forests are replaced with roofs, concrete, and asphalt; all of which do not allow rain to penetrate the earth. Instead, the fallen rain quickly runs directly into storm drains, ditches, and streams, all without the benefit of filtration.

To add to this problem, the water that is running directly into the streams is often picking up pollutants along the way. These pollutants can include motor oils and gasoline that leak from vehicles, fertilizers and pesticides from lawns and gardens, and anything else that will float or dissolve in water. Pollution by this means is called non-point pollution, and is a huge problem. In fact, non-point pollution accounts for over half of the pollution reaching our creeks, streams, and Puget

Sound. The closure of many local beaches to shellfish harvesting and diminishing fish populations are signs of pollution problems in Puget Sound. These problems clearly indicate the need for programs that address the control of non-point source pollution.

People really can make a difference when it comes to reducing stormwater runoff and the problems and costs that go with it. Because we all contribute to the problem, we all can be a part of the solution. It starts with paying attention to stormwater — at home, at work and in our communities.

We can reduce the amount of runoff.

Reduce the amount of paved or hard surface areas. Consider permeable paving for that new patio or driveway. Look for ways to keep runoff out of the stormwater system so it can soak into the ground. Plant rain gardens. Use rain barrels. Wash your car on the lawn or at a commercial car wash that recycles water. (This helps prevent runoff pollution, too!)

We can create cleaner runoff.

Reduce fertilizers, turf builders and pesticides on your lawn and garden. Use small amounts of slow-release fertilizer and environment-friendly products for problem areas. Reduce pollution from roads, driveways and parking lots.

Wear and tear on roads, tires and brakes leaves a lot of pollutants behind. Fix vehicle fluid leaks immediately, and consider alternatives to driving solo. Reduce bacterial pollution from animal waste. Scoop pet waste and put it in your garbage. Cover and control animal manure on small farms. Maintain your septic system. This will keep it from fail-

ing and causing pollution.

We can work together.

Get involved with community stormwater projects such as marking storm drains, maintaining neighborhood green spaces, and establishing pesticide aware neighborhoods.

Participate in your local watershed management group and in land use, stormwater and development planning with your city or county. Support smart development practices that maximize the natural vegetation.

Don't ignore illegal dumping or polluting. This only continues harming the environment and our drinking water supply while making it more costly to clean up.

Report any dumping or illicit discharge by calling Public Works Department at (360) 829-1631 or emailing buckleyrwd@cityofbuckley.com.

City of Buckley's *Hanging Floral Baskets*

**It's that time of year again....
The days are getting longer and
spring is in the air.**

**It's time to plan for the beautiful
baskets that have adorned our city streets
and parks for several years.**

**Again we ask if you would be willing to donate \$25, it will help to
offset the cost which is \$50 per basket.**

**Please fill out and return portion below to help with this city beau-
tification project.**

*Thank you for your generosity in
the past and future!!*
