

**C. SIGNATURE**

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

**D. SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS**  
*(do not use this sheet for project actions)*

Because these questions are very general, it may be helpful to read them in conjunction with the list of the elements of the environment.

When answering these questions, be aware of the extent the proposal, or the types of activities likely to result from the proposal, would affect the item at a greater intensity or at a faster rate than if the proposal were not implemented. Respond briefly and in general terms.

D.1. How would the proposal be likely to increase discharge to water; emissions to air; production, storage, or release of toxic or hazardous substances; or production of noise?

*Comprehensive plan amendments likely will not increase discharges or emissions; or create substances or noise.*

Proposed measures to avoid or reduce such increases are:

*E-7, Utilities Element, contains a chapter on stormwater collection and treatment level of service for stormwater treatment and collection; lists 19 capital improvement projects, and contains two drainage-related policies. Hazardous waste is addressed through five policies.*

*E-8, Capital Facilities Element Contains a chapter on stormwater collection and treatment, a level of service that matches the utility element, copies in the 19 capital improvement projects, and contains no drainage-related policies. Hazardous waste is not addressed.*

D.2. How would the proposal be likely to affect plants, animals, fish, or marine life?

*Comprehensive plan amendments likely will not increase affect plant or animal life.*
