

# WIPES CLOG PIPES!

The label may say “flushable” or “disposable” but these products can clog your sewer line.

## DON'T FLUSH

- Personal Wipes
- Baby Wipes
- Paper Towels
- Cleaning Wipes
- Disposable Diapers
- Q-Tips
- Moist Towlettes
- Prescription Drugs or Pharmaceuticals

Unlike toilet paper, these products don't break down once they are flushed.

They can cause blockages in your on-site side sewer, and create service issues in the public sewer system.

Save yourself and your sewer utility from costly repairs and replacement bills!

Put wipes, rags and towels in the trash, not the toilet.
